

Niviann M. Blondet, MD

Niviann M. Blondet, MD, is an Assistant Professor in the Department of Pediatrics, Division of Gastroenterology and Hepatology, at the University of Washington in Seattle, where she also serves as the Program Director of the Pediatric Transplant Hepatology Fellowship. She is an attending physician at Seattle Children's Hospital.

Dr. Blondet received her medical degree from the University of Puerto Rico School of Medicine. She completed her Pediatrics and Pediatric Gastroenterology Fellowship at the University of Texas, and her Pediatric Transplant Hepatology Fellowship at the University of Washington. She is a member of the Society of Pediatric Liver Transplantation (SPLIT) Registry Operations Committee, the North American Society for Pediatric Gastroenterology, Hepatology and Nutrition (NASPGHAN) Training Committee, and the United Network for Organ Sharing (UNOS) and Organ Procurement and Transplantation Network (OPTN) Minority Affairs Committee, as well as a member of the Executive Committee of the University of Washington Committee on Minority Faculty Advancement, and Mentor Liaison of the Seattle Children's Hospital Hola Inclusion Network. She has authored or co-authored several peer-reviewed articles, book chapters, and numerous abstracts, and participated in national, international, and local presentations on topics in hepatology.

Dr. Blondet is Site Primary Investigator for the Global Alagille Alliance (GALA) Study, conducting a comprehensive analysis of patients with Alagille syndrome to determine its prevalence, natural history, socioeconomic burden, and outcomes. She is Site Co-investigator for the Childhood Liver Disease Research and Education Network (ChiLDRen), a multicenter research network developed to support the discovery of new diagnostic, etiologic, and treatment options for children with liver disease and those who undergo liver transplantation.

Amber Hildreth, DO, FAAP

Amber Hildreth, DO, FAAP, is Health Sciences Assistant Clinical Professor at the University of California San Diego (UCSD), Medical Director for Liver Transplant at Rady Children's Hospital in San Diego, and Physician Investigator at the Rady Children's Institute for Genomic Medicine. She received her medical degree from Rocky Vista University College of Osteopathic Medicine in Parker, Colorado.

Dr. Hildreth is a member of the NASPGHAN Professional Development Committee and the Fontan Outcomes Network Liver Health Expert Feedback Working Group. She is the Advocacy Committee Chair of the Society of Pediatric Liver Transplantation.

Dr. Hildreth has published articles in peer-reviewed journals including the *Journal of Pediatric Gastroenterology and Nutrition*, *Liver Transplantation*, *Pediatric and Developmental Pathology*, and *The American Journal of Human Genetics*, as well as numerous abstracts, invited presentations, and CME/Grand Rounds presentations. She has reviewed articles for *Clinical Liver Disease*, *Journal of Pediatric Gastroenterology and Nutrition*, *Cold Springs Harbor Molecular Case Studies*, *American Journal of Transplantation*, *Hepatology Communications*, *The Journal of Pediatrics*, and *Pediatric Transplantation*.

She is UCSD Site PI for the Studies of Pediatric Liver Transplantation Registry and the Severe Acute Hepatitis in Pediatric Patients (SHIP) Registry.

Sara Hassan, MD

Sara Hassan, MD, received her medical degree from American University of Beirut in Beirut, Lebanon.

Dr. Hassan is a member of the NASPGHAN Hepatology Committee and the Registry Operations and Research committees of the Society of Pediatric Liver Transplantation (SPLIT).

She has authored or co-authored several peer-reviewed articles published in journals including *Liver Transplantation*, the *Journal of Pediatric Gastroenterology and Nutrition*, *Pediatric Blood & Cancer*, *Clinical Liver Disease*, and *Hepatology*, a book chapter on abnormal liver tests in children, and numerous abstracts and invited regional, national, and international presentations. Dr. Hassan is co-author of the article "Autoimmune gastrointestinal dysmotility following SARS-CoV-2 infection successfully treated with intravenous immunoglobulin," published in *Neurogastroenterology & Motility*, which ranks within the top 10% of papers published and is one of Wiley's most widely read papers.

Dr. Hassan is a Reviewer for *Hepatology*, the *Journal of Pediatric Endocrinology and Metabolism*, *Liver Transplantation*, and the *Journal of Clinical and Translational Hepatology*, as well as Abstract Reviewer for Digestive Disease Week and the American Association for the Study of Liver Diseases. Her interests include exploring both the hepatic and transplant implications of genetic and metabolic diseases in pediatric patients.
